

Figure 1 is a block diagram of a color image processing system 100. The system 100 includes an analog-to-digital converter 108, a first color recovery filter 114, a first interpolator 116, a second color recovery filter 122, and a second interpolator 124. The system 100 also includes a first color data block 111, a first recovered data block 112, a second color data block 128, and a third color data block 132. The system 100 further includes a first color data block 120 and a first color data block 130.
